

Looking Closely

Photo Analysis Worksheet

Tom Morton

Step 1. Observation

A. Study the photograph for two minutes. Form a general impression of the photograph and then examine individual items. Slowly scan from right to left and top to bottom to see what new details become visible.

B. List the people, objects, activities and landscape features in the photograph.

People	Objects	Activities	Landscape

Step 2. Inference

Based on what you have observed above, list three things you might infer from this photograph.

1	
2	
3	

Step 3. Questions

A. What questions does this photograph raise in your mind?

B. Choose the question that you think is the most interesting and important? How will you go about answering it?

C. How will you know if your answer is a good one?
